

## BATTERY CHARGER

New from GYS is the GYSFlash 7A advanced battery charger. Featuring the latest technology, the GYSFlash is designed to take maximum care of all modern battery types including GEL and AGM/Start-Stop.

The device uses a 10-stage microprocessor controlled charging curve to ensure an effective charge is achieved without risk to the battery. Despite the many battery types now fitted to vehicles, no user selection is required, eliminating the chance of error and resultant risk to the battery. It will charge 12V batteries up to 130Ah, maintain batteries up to 230Ah and is suitable for use with Lead Acid, GEL, Silver/Calcium, AGM/EFB and Start-Stop batteries.
